SOUTH EASTERN ADVISORY SERVICE NETWORK

63rd IALB, 13th EUFRAS and 10th SEASN Conference, 10. – 13. September 2024, Edinburgh, Scotland

WHO IS SEASN?

South Eastern Advisory Service Network (SEASN) is a consortium of agricultural advisory services, chambers, institutes, faculties, and NGOs. We enhance Southeast European agriculture through digitalization and EU projects, organizing workshops, trainings, and events to promote knowledge exchange and stakeholder collaboration. Our efforts aim to boost sustainability, competitiveness, and innovation in the agricultural sector.

SEASN'S ACTIVITIES

- **Publishing** educational materials.
- **Cooperating** with other organizations and institutions.
- Introduction of the **Common Agricultural Policy (CAP EU)**, preliminary at pre-accession countries.
- Promoting and facilitating the **exchange of knowledge**, experiences, and best practices.

SEASN'S OBJECTIVES

- Sharing and implementation of **good practices** among members and others.
- **Enhance the efficiency** of agricultural advisory services
- Facilitate a vibrant and continuous exchange of knowledge
- Establishing consistent **communication/connection** among members

SOME OF SEASN'S WORK ON CURRENT PROJECTS

i2connect

In this project, SEASN handles collecting successful practical cases and organizing cross-visits for advisors, along with preparing detailed reports. We also organize the final i2connect conference and contribute to Regional Stakeholder Workshops on Agricultural Knowledge and Innovation Systems (AKIS).

STRATUS

In this project, we actively contribute to expanding the network by distributing brochures and other educational materials. We are also tasked with creating detailed guidelines to support cross-visit organizations, ensuring effective communication and knowledge exchange among stakeholders.

OrganicAdviceNetwork

In this project, we participate as a partner and representative for advisory services in the southwestern (Balkan) region. Members of our network organize cross-visits, allowing other project partners to learn about different organic farming methods specific to various agricultural sectors and the unique geographical characteristics of our region.

CLIMED-FRUIT

In this project, our network members (IPN) are involved alongside SEASN. Our role includes creating digital stories and providing detailed guidelines for organizing digital cross-visits, ensuring effective communication and knowledge sharing among participants.
